CashKeeper Ready

CashKeeper®
Closed and secure cash handling
CK900 / CK900V

CashKeeper

A definite solution

Managing cash is always a delicate situation.

A recurrent problem in many establishments is getting the cash register to tally at the end of a shift or a working day.

There can be loss of takings due to wrong payments, false notes, mistakes when giving change, petty thefts and robberies at the point of sale.

Money, notes as well as coins are carriers of germs and substances that can produce allergies.

With our secure system for managing cash, we manage to resolve all these problems in a quick and effective manner.

CK900 / CK900V

Compact equipment

With only one piece of equipment, you can manage notes and coins.

Easy to install.

Security

No one sees or touches the money.

There are no temptations.

Money is never on show or at reach of possible thieves or employees.

Avoid robberies and thefts.

All transactions are paid for.

No mistakes when giving change.

Securely clamps to counter.

Hygiene

Personnel never touch the money.

Especially important in butchers, fishmongers, coffee shops, bakeries and other food establishments.

Control

The cash register always tallies.

Controls authenticity of notes and coins.

Immediate cash flow information.

Takings collected in closed and replaceable compartments.

Notes as well as coins.

Compartments can be changed without opening them.

No need to panic at shift changes and at the end of the day.

Alerts if low on change.

Effective monetary control.

Convenience

No need to re-fill with change.

Easy to use and install.

Accepts and verifies 3 coins per second

Only accepts authentic notes

CK900

compact system

- CK900 is the ideal system for the effective managing of any business.
- With CashKeeper, the till always tallies.
- Only accepts genuine notes.
- Money is not in view at any time.
- An efficient and safe system.
- An intelligent solution for peace of mind.
- For it to function, it must be connected to a POS terminal, whose software must be integrated with CashKeeper.
- Supports any POS program which functions with Windows® operating system.
- Connection to the POS is via USB 2.0.

Integrated visor display of high luminosity

Security block

Unblocking mechanism of the drawer

Extraction of note cashbox

Operating without integration

The CashKeeper CK900V can also operate without any integration or connection to a POS.

Has a mini sales program, like a till.

By simply connecting the screen you can sell and receive payments immediately without integration or connection to a POS.

With CashKeeper, you can also sell by using a barcode reader which can read receipts issued by a scale, without connection.

Plug-in and you´re ready.

Peripheral devices are optional

Characteristics

The CashKeeper system CK900V shares the mechanics of the CK900V.

It is equipped with an integrated computer for greater benefits and more flexible operation.

Allows integration with any software on the market, Independently from its own operating system (Windows, Linux, system administrator).

Can also be operated independently, by simply connecting a screen or a barcode reader.

Includes a Windows operating system POS ready and a mini sales Program, cash register type.

Optionally can be connected to a POS via WIFI, without any cables on the counter.

Works simultaneously with various POS connected.

Permits programs to be loaded to POS and peripherals to be connected.

Can send automatic e-mails regarding change levels and high or low takings (connection to internet is necessary.)

Save space on the counter.

Connectivity
